# National Stock Number

The Government uses National Stock Number's (NSN) which contain sub-groups that identify the Federal Supply Groups (FSG) , Federal Supply Classes (FSC), NATO Country Code, National Item Identification Number NIIN) and the serial number of the product.

A National Stock Number is simply the official label applied to an item of supply that is repeatedly procured, stocked, stored, issued, and used throughout the federal supply system. It is a unique item identifying series of numbers. When a NSN is assigned to an item of supply, data is assembled to describe the item.

# Post Award Requests (PARs)

Once you receive the award, you may need to use PARs:

A Post Award Request (PAR) is an electronic request for post-award action or information on an award that can be created and submitted by suppliers via DIBBS.

- PARs allow suppliers to communicate their requests for post-award action or information directly to the Post Award Administrator.
- PARs provide tracking visibility into post-award actions and status.
- Previous methods of processing and tracking post-award actions (email, phone, fax, etc.) should be managed by PARs to provide transparent tracking.
